Fashionable folks are doing their frivoling less and less in the town and more and more at their country seats. Halloween, which, as all the world knows, comes on the last day of October, and in the heart of the Indian summer, is an ideal fate for the jolly house parties that are making merry in Lenox and Tuxedo and all along the line of the autumn stamping grounds of the smart set.

To make a short story of several detached chapters, culled from order books, Halloween is to be given over this year to feasting and dancing, and midnight trick revels that are to be robbed of their grewsomeness out of consideration for the timidity of the timor-ous and divested of the more boisterous bumpkin autics out of regard for elegant Belindas and Bobbins who do not like to ruin their togs bobbing for apples in a tub. and doing similar feats of the peasantry.

There are to be any number of dinner par-ties on Halloween, with dancing for the aftermath; and for the cotillion, without which a dance newadays is like a bird without a song, all the favors are being ordered with especial reference to the manifold felk tales of the Scottish country folk, from whom most of the Halloween tricks and trumperies have been handed down. Foremost are the Brownles

Halloween gift gets its one from the line of Burns' Halloween 'Pou the stocks,' or rather from the superstition that the poet there refers to. Bealdes the costlier gifts, there are any number of comparatively inexpensive trinkets that answer for German favors, among them being many times "twa red cheekit apples." made in natural hues of silk and crepe paper, and also some trick apples that open to disclose bonbons. The fad of every hostess is to have unique

favors, and this presupposes a specially designed supply. For a house party in the signed supply. For a house party in the Berkshires there are being made some witch caps and brooms, and for the men some fantastic "jumpers," all of which are to be donned just before midnight, in which to work some spells that are to take place in a huge new barn on the estate.

The novelties of the season are largely prepared to fill private orders, but the dealers report a growing demand for trinkets symbolizing spe cial fetes, and for this general trade that has not arrived at the munificence of having special designs made to their order, nothing is in greater demand than the Brownies. who in their several shapes upon their sev-eral pins will go "aff careerin" fu' blythe that night."

In the third act of the new farce Con roy & Fox sing the song, "Mrs. O'Flaherty," and ask some one in the audience for the loan of a silk hat in order to illustrate the second verse of the song and the hat is always forthcoming, as it is always arranged for. Mr. Fox, who always makes the request, was a little nonplussed but he took the hat and instead of a hat prepared for the occasion being smashed Mr. Sweeney's hat was the victim, and it was a hard matter to tell for a while who created the most fun, the stars on the stage or Mr. Sweeney.

ART GOSSIP.

The art loan shows to many beautiful and interesting pictures that one cannot resist the impulse to visit it often. It will remain open to the public only a short time longer, and then the loan exhibition will close, and the pictures be returned to their owners, who have generously permitted them to be exhibited to the public for a few Mr. Thomas Swobe loans a number of valuable originals in oils. "Siesta," by Jean Beaudine, shows a country court in which a brood of chickens and a dainty family of white, long-cared rabbits are enjoy-ing an afternoon rest. An old broom of faggots lies on the ground, a coat of blue jeans hangs on the end of a beam, and the barn door, with heavy lock and clumsy hinges, complete the details of the back-ground. The hens are alive and some of them are hungry; a splendid cock in shining plumage poses himself in arrogant im portance, and his exalted position among his feathered tribe is not doubted. A fine fat white rabbit is curled up into a soft ball of fur and is fast asleep. The picture is charming in its true portrayal of country barnyard life. "Love in the Wine Ceilar," by Meisel, represents the interior of a typical German drinking "cave," with its quaint decorations of stag antiers metamorphosised into the form of a woman, large wine casks of mosel and old Flemish jugs and stone benches. A pretty German g.rl sits by the big "fors" and is looking with smiling face at the love token just given her—a small golden heart attached to a golden necklace, which she holds admiringly in her hand. Near her, in easy, graceful attitude, sits the gallant knight, the hero of the hour. He has thrown us de his mantle of crimson vel-vet and his sword and they lay in a picturesque heap just back of him upon a rude wooden bench. His mandolin is posed carelessly against his leg and he leans forward, pipe in hand, to watch more closely sents the type which one is accustomed to associate with legends of the Rhine—a trou-badour who could do brave deeds and sing of love in the same breath—a character. fact, without which German lore
